

## AGV Mechanical Engineer Project Execution - Mobile Automation (m/f/x)

**KION Mobile Automation** develops mobile robots, robotic fleet controllers and cloud-based fleet management systems for industrial logistics applications. We are a fast growing team with locations in the USA, China, Australia, Belgium and Germany.

As part of the international **KION Group** and company culture you will work in an open, transparent and agile environment and you will be a valuable member of an effective, globally successful organization. You will get to work with the products and solutions through the entire lifecycle from development to installation and service.

**Dematic** is one brand under the KION Group of companies and has implemented more than 6,000 integrated systems for a customer base that includes small, medium and large companies doing business in a variety of market sectors.

### What we offer

- We are the largest provider of mobile automation worldwide and want to further expand our leadership position
- We have the speed and short decision-making paths of a start-up, but the financial security, sales & service networks and the standing of a large corporation
- Our products are the solution to our customers' needs which are seamlessly integrated in complex environments, delivering uptime and confidence to our customers
- We develop technologies supporting industry with state of the art robotic solutions

### Tasks

- You assist in defining project concepting with a focus on standardisation and cross project conformity
- In collaboration with lead engineers you are responsible for mechanical engineering of complex project vehicles
- You validate the design and concept with proficient 3d-modelling and professional production engineering drawings
- You can assist and guide junior mechanical engineers, with an emphasis on process and procedure
- You actively implement and help to refine process and procedure in collaboration with team manager and lead engineers
- You work efficiently according to agreed project planning and align with team manager, electrical and software engineering to drive the project forward
- You cultivate and promote our corporate values – integrity, collaboration, courage, excellence

### Requirements

- Bachelor's degree or comparable training, preferably with a technical engineering focus
- Minimum of 2-5 years of relevant experience within Automation Industry, (Automated) Material Handling Solutions, Machinery & Industrial Engineering or related machine building industries
- Strong technical knowledge and understanding
- You are skilled in the use of SolidWorks and its EPDM system. Working knowledge of ERP systems and issue tracking systems (SAP, JIRA..) is an asset
- Team player with a high level of communication skills
- Fluent in English. Dutch, German and French is an asset

### Brief Facts

#### Department Info:

In the Mechatronics Engineering Department AGV they take care of the daily execution of project based automated guided vehicle engineering.

## KION Group: „We keep the world moving“

The KION Group is a global leader in industrial trucks, related services and supply chain solutions. Across more than 100 countries worldwide, we design, build and support logistics solutions that optimize material and information flow within factories, warehouses and distribution centers. Our employees are actively involved in shaping the Internet of Things.

Our Linde and STILL forklift brands serve the premium industrial truck segment. Dematic is a leading supplier of integrated automated technology, software and services to optimize the supply chain. Dematic employs over 8,000 skilled logistics professionals to serve its customers globally, with engineering centers and manufacturing facilities located around the world.

KION Mobile Automation with its 300 dynamic and motivated employees is expected to double its workforce in the next two years. A total of more than 6,000 automated vehicles are currently in use, which have so far transported 3.4 billion pallets and drove more than 300 million kilometers - this corresponds to about 7500 rotations of the earth.

Our actions are guided by our shared KION Group values – integrity, collaboration, courage and excellence.

Would you like to go your way in a unique, technology-savvy organization and make a significant contribution to further expansion?
